Rao Tariq Jameel

Cloud Security Engineer (Aspirant)

Luleburgaz, Turkey (Open to Relocate) | +90 543 161 2520 | raotariqdeveloper@gmail.com | GitHub: raocybersec | raocybersec.github.io

Professional Profile

Computer Science graduate specializing in Cloud Security Engineering and Network Defense. Proficient in Linux (Ubuntu/Kali), TCP/IP networking, and technical lab documentation. Focused on cloud-native security, zero-trust architectures, and hands-on Linux administration.

Technical Skills

Operating Systems: Linux (Ubuntu, Kali), Windows, Windows Server
Networking: TCP/IP, DNS, DHCP, HTTP/S, SSH, Packet Analysis, Subnetting
Security Tools: Nmap, Wireshark, Metasploit, Dirb, Wazuh (Basic), Splunk (Learning)
Cloud & Virtualization: VirtualBox, VMware, AWS/Azure Security Groups & IAM
Programming: Python (Foundational), Bash Scripting, SQL
Platforms: Git, GitHub, Jekyll (Chirpy), Markdown

Projects

- **Zero Trust SSH / Bastion Server:** Implemented Ed25519 authentication, disabled root login, configured firewall and Fail2ban intrusion protection.
- **Network Reconnaissance & Analysis Lab:** Performed service enumeration and packet analysis using Nmap, Dirb, and Wireshark with documented TCP/IP analysis.
- **Cloud-Ready Portfolio:** Built and deployed a technical security blog using Jekyll and GitHub Pages to document labs and security milestones.

Education

Bachelor of Computer Science
NFC Institute of Engineering and Technology, Multan, Pakistan — 2018
Dean’s List Honors | Programming Contest Champion
